

BAY LASER HAIR REMOVAL CLINIC

At Bay Laser Clinic, our focus is delivering the highest quality of service to our clients. Our warm and welcoming atmosphere allows our clients to feel comfortable in a friendly and professional environment. Our brand new, state of the art clinic is conveniently located in the heart of Rose Bay in Sydney's Eastern Suburbs, and is operated by a team of highly qualified and experienced laser hair removal therapists. Our medical grade, FDA approved Alexandrite laser machine delivers superior and effective treatments at affordable prices.

LASER HAIR REMOVAL vs IPL (Intense Pulse Light)

Laser produces a stable, true continuous output of only one particular wavelength (colour of light), which safely targets and destroys the hair follicle without causing any damage to the surrounding skin and delicate pores. On the other hand, an IPL machine operates on broad light spectrum, sending out multiple wavelengths. IPL cannot isolate the exact wavelength necessary to accurately and safely destroy the hair follicle. At Bay Laser Clinic, the Alexandrite laser we use is absolutely precise with the highest level of safety.
